

# Set up branch rules for GitHub repository. Scribe<sup>®</sup>

1 Navigate to <https://github.com/<sua-conta>/<seu-repositorio>/settings>

2 Click "Branches"

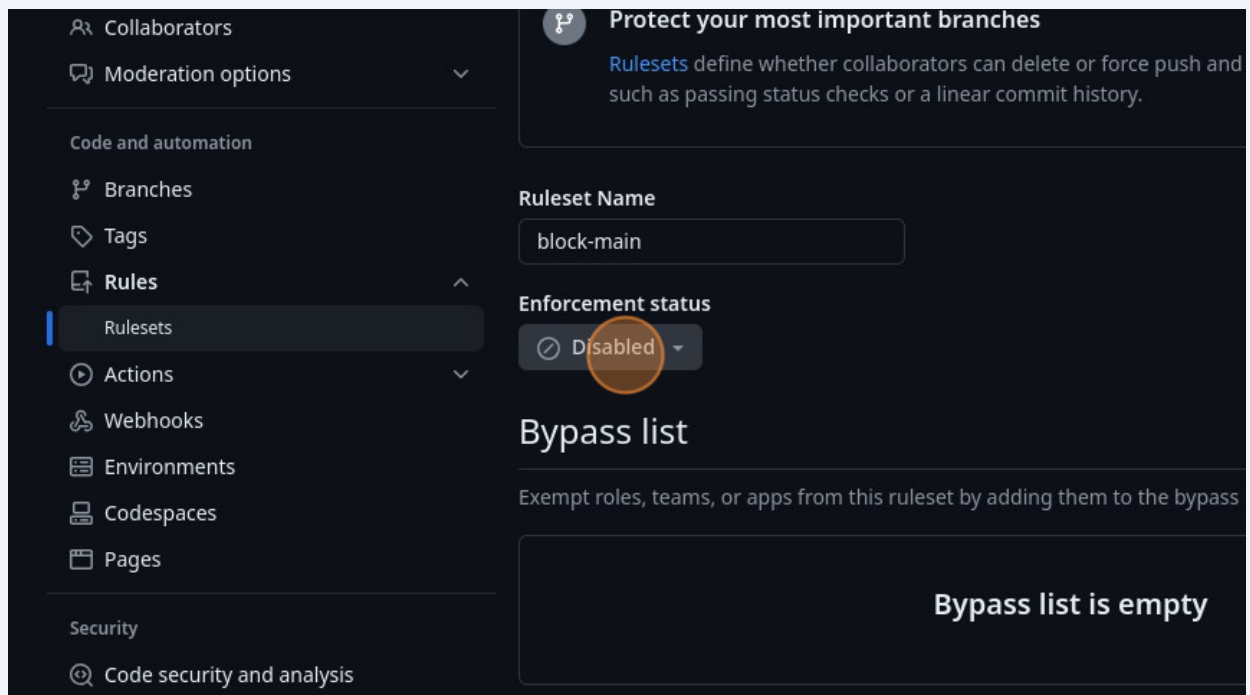

### 3 Click "Add branch ruleset"

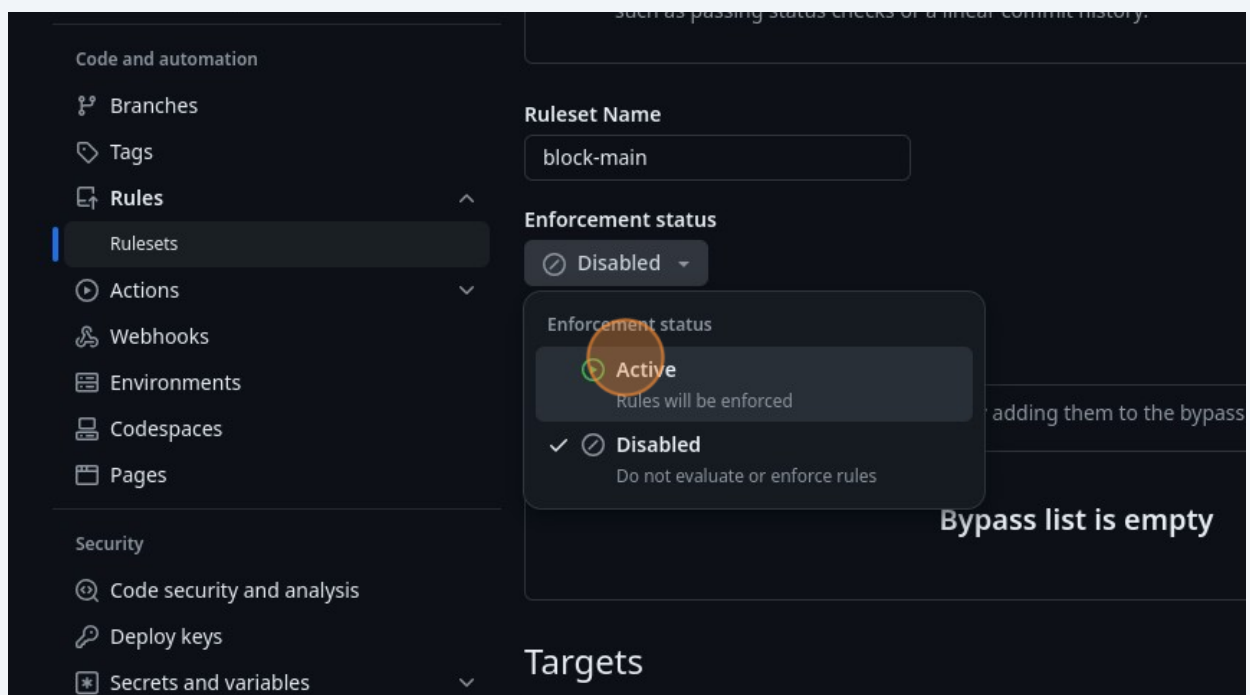

### 4 Type "block-main"

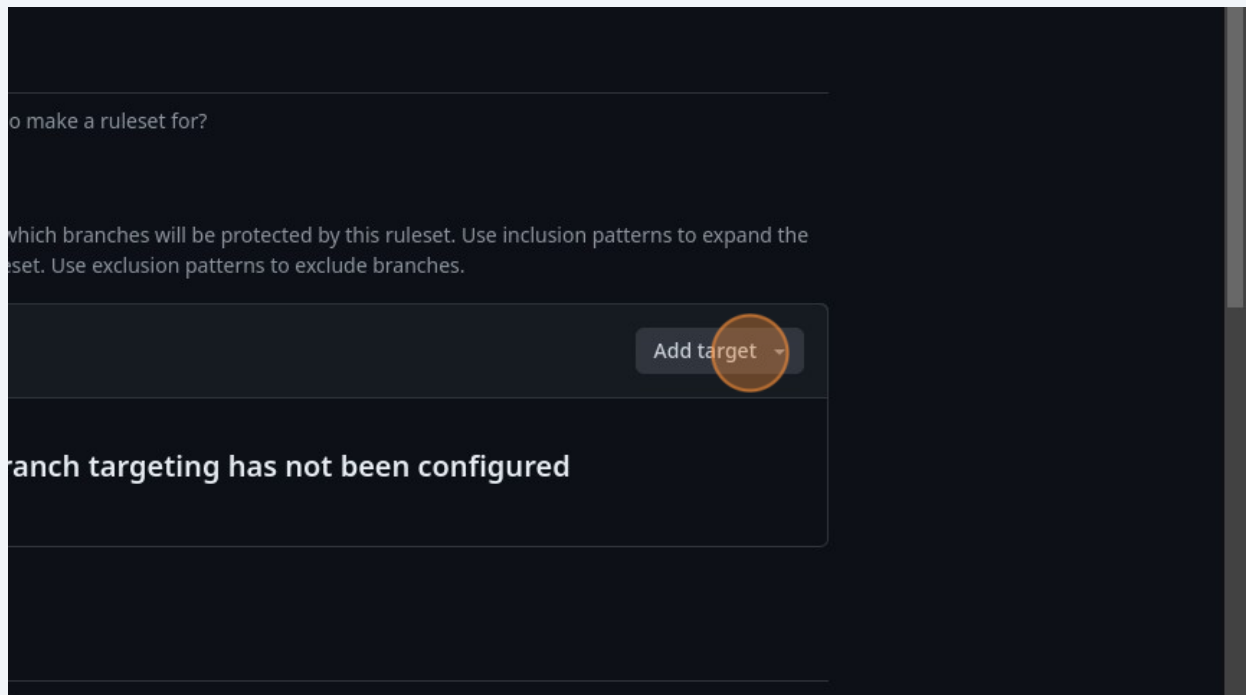

## 5 Click "Disabled"

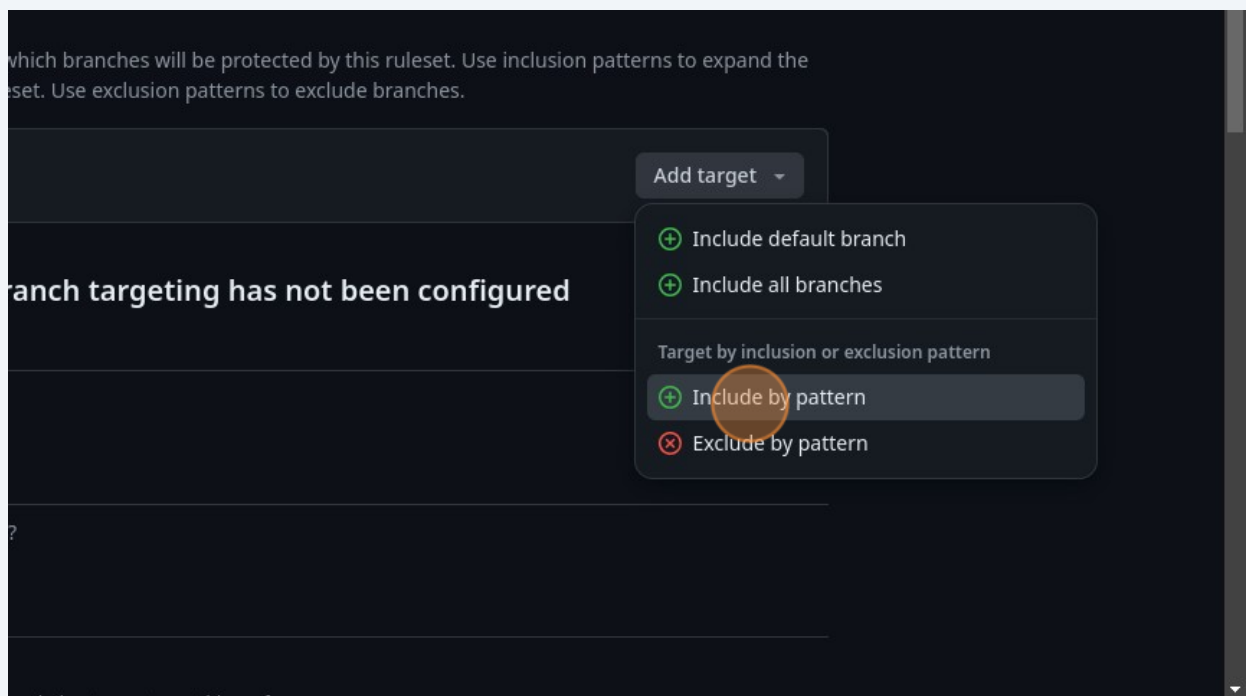

## 6 Click "Active"

## 7 Click "Add target"

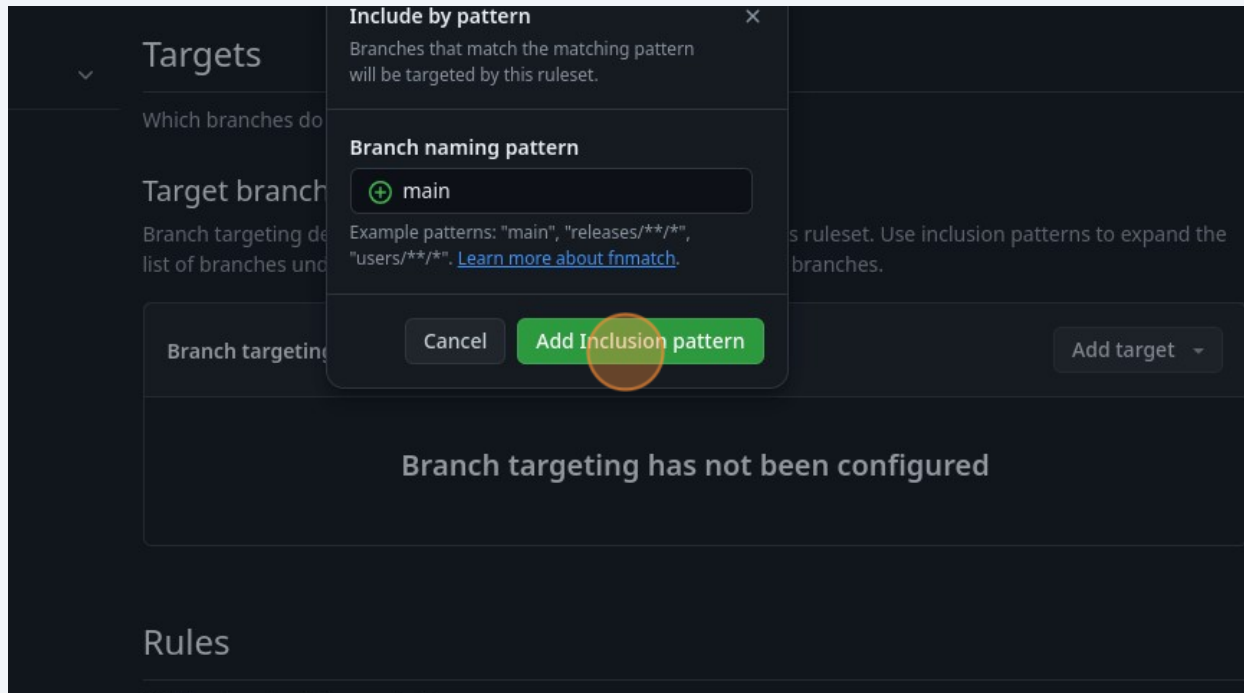

## 8 Click "Include by pattern"

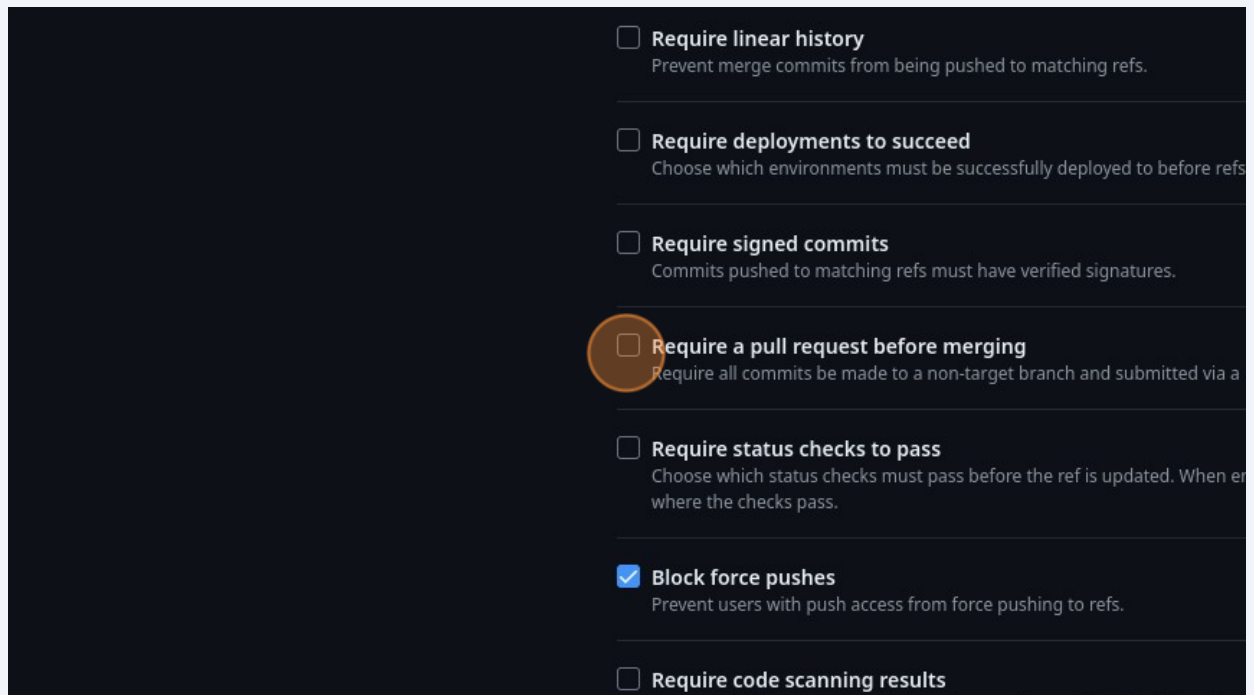

9 Type "main"

10 Click "Add Inclusion pattern"

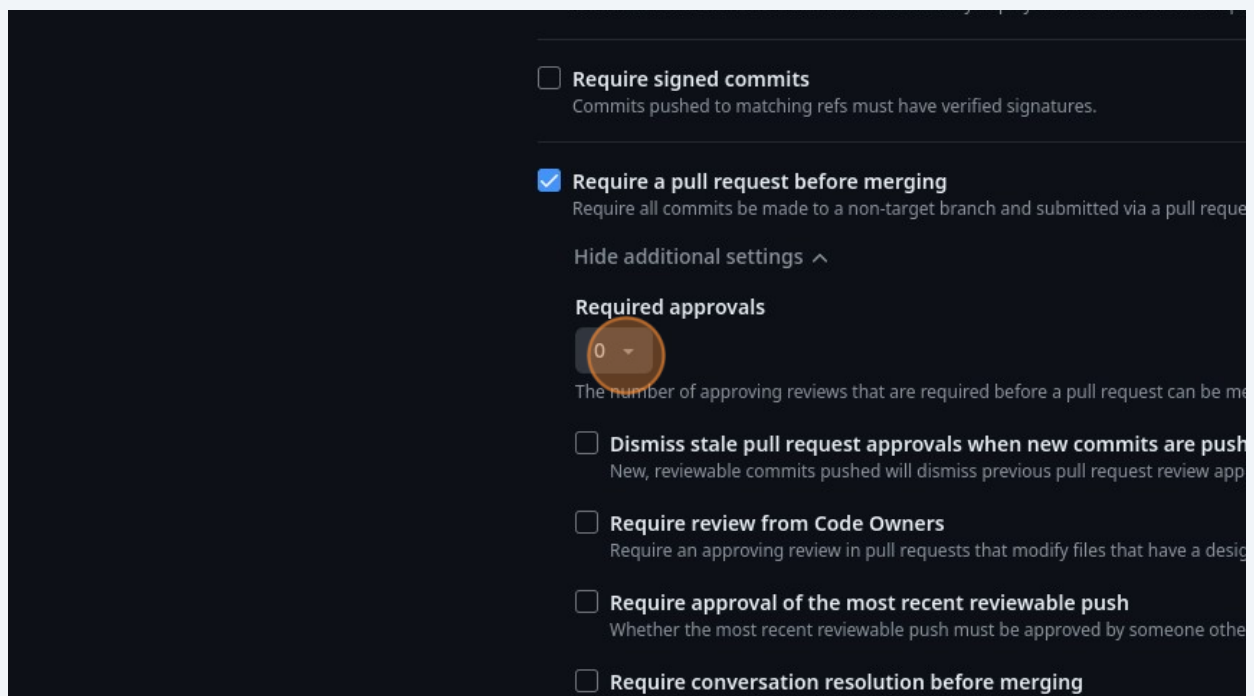

11 Click the "Require a pull request before merging" field.

A screenshot of the GitHub repository settings page, specifically the 'Require a pull request before merging' section. The settings are listed as follows:

- ☐ **Require linear history**  
Prevent merge commits from being pushed to matching refs.
- ☐ **Require deployments to succeed**  
Choose which environments must be successfully deployed to before refs.
- ☐ **Require signed commits**  
Commits pushed to matching refs must have verified signatures.
- ☐ **Require a pull request before merging**  
Require all commits be made to a non-target branch and submitted via a pull request.
- ☐ **Require status checks to pass**  
Choose which status checks must pass before the ref is updated. When enabled, the ref is updated only when the checks pass.
- ☒ **Block force pushes**  
Prevent users with push access from force pushing to refs.
- ☐ **Require code scanning results**

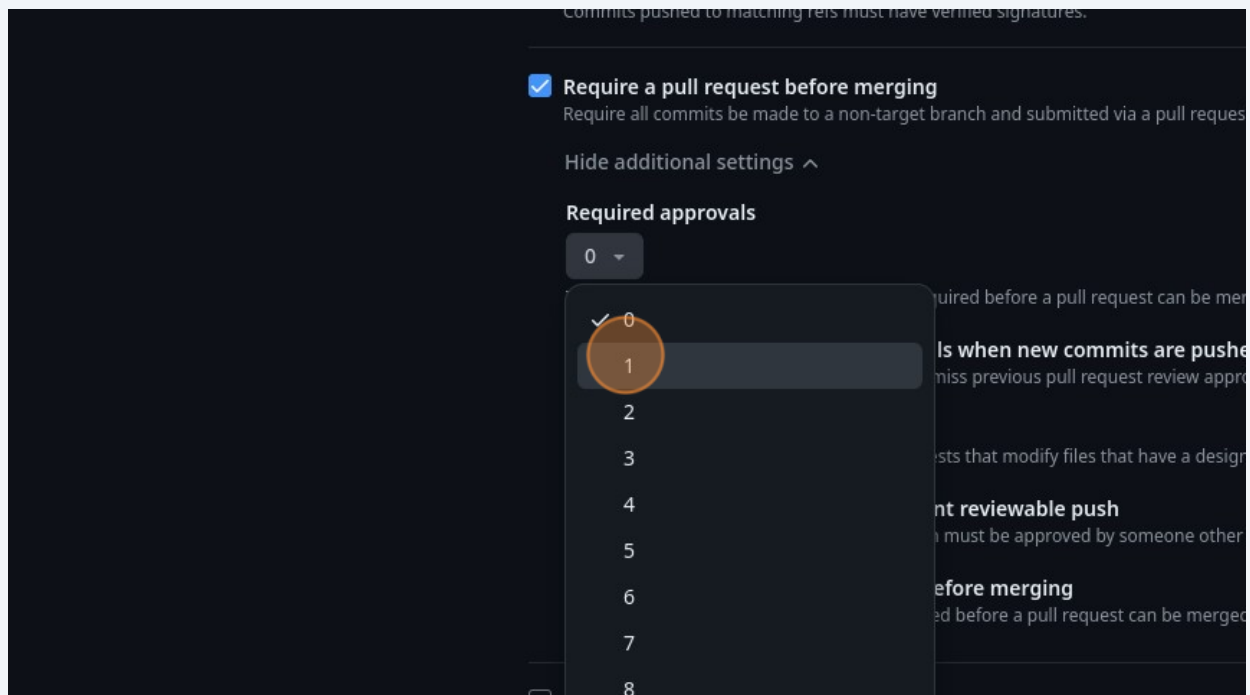

12 Click "0"

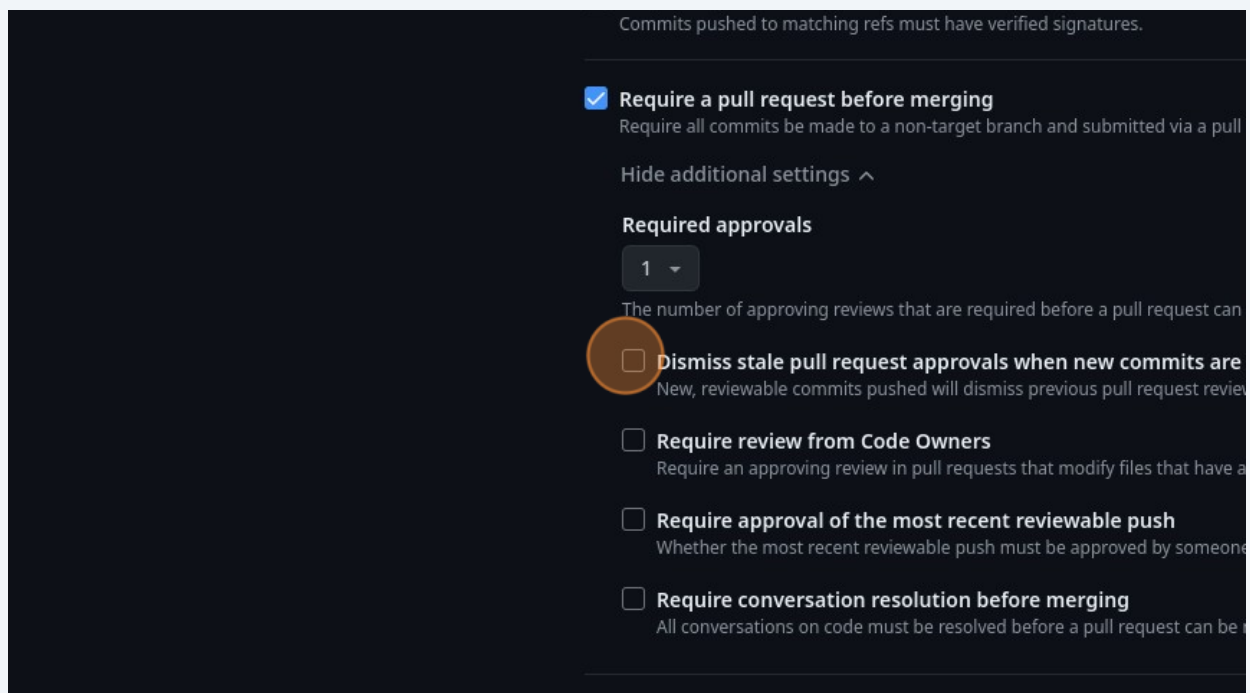

A screenshot of the GitHub repository settings page, specifically the 'Required approvals' section. The settings are listed as follows:

- ☐ **Require signed commits**  
Commits pushed to matching refs must have verified signatures.
- ☒ **Require a pull request before merging**  
Require all commits be made to a non-target branch and submitted via a pull request.
- Hide additional settings ^
- Required approvals**  
0  
The number of approving reviews that are required before a pull request can be merged.
- ☐ **Dismiss stale pull request approvals when new commits are pushed**  
New, reviewable commits pushed will dismiss previous pull request review approvals.
- ☐ **Require review from Code Owners**  
Require an approving review in pull requests that modify files that have a designated code owner.
- ☐ **Require approval of the most recent reviewable push**  
Whether the most recent reviewable push must be approved by someone other than the pusher.
- ☐ **Require conversation resolution before merging**

13 Click "1"

14 Click the "Dismiss stale pull request approvals when new commits are pushed" field.

## 15 Click "Create"
